Lockheed Martin Application Communities Integrator

- To effectively support the AC Initiative, the LM team will call upon strengths from applications and services providers
- We will leverage our own agile processes and architectures, with promising specific technologies to provide integrated business solutions

Lockheed Martin Advanced Software Integration

- Applying relevant technologies
 - Service oriented architectures
 - Integrated modeling systems
 - End to end warfighter information systems
- Lockheed Martin Council of IT Architects
 - Involve LM IT folks for day to day AC challenges, 120k+ employees
- Strategic alliance technical participant with a number of commercial application vendors
- Technology Transfer Program
 - - corporate program shares cost to market with individual LM company funds
- IP issues with industry, universities, government agencies and non-profit labs
- Examples
 - SAML implementation, JSF intrusion
 - Finance data shared through SOA data objects

A Candidate Application Community Model

Focus Areas

- **Improved Agility**
 - 2SERV EIS support to diversity Vs homogeneity apps
 - Metrics gathering to support model validation and continuous improvement
- **Promising technologies**
 - Few examples from today . . .
 - Need to work the IP issues
 - Large scale apps deployment
 - Eventual products and services DoD will buy
- **Looking to team for specific technologies**
